

# LET'S GET ROLLING

All the essentials you  
need before becoming  
ICB approved

## WHY CHOOSE ICB?

Almost 40 years experience  
with waterproofing systems in the UK

All of our membranes are  
thoroughly tested and certified

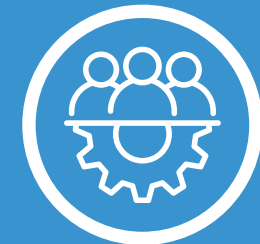

First in the industry to introduce  
Environmental Product Declarations

Trusted by architects,  
roofing contractors & developers

25 Year Guarantees available on  
our waterproofing membranes

We have one of the industry's largest  
teams of expert consultants

# SUPERIOR QUALITY SOLUTIONS, WHATEVER THE APPLICATION

**When you choose to work with ICB, not only will you receive premium quality products at very competitive prices, but you will also be tapping into all of the additional benefits that we can provide.**

We're all about service and the technical excellence of our team stands out from the crowd. You will personally be assigned a Regional Technical Manager (RTM), some of whom hold decades of experience in the roofing industry. Your RTM will have the product and technical knowledge across all Group products, giving you a single point of contact no matter what your query may be.

The service doesn't stop there; our team of Regional Field Technicians are never far away. They are around to assist on-site, be it for an initial survey, during the project, or afterwards to inspect the quality of the work. We work with you closely on every project, ensuring everything goes smoothly along the way.

We have every confidence in our products and all contractors are expertly trained by us personally. This, along with our quality control inspection process, means we have no hesitation in issuing extended product warranties of up to 25 years.

## WHY CHOOSE **alwitra<sup>a</sup>**?

- ✓ Bitumen-free & solvent-free
- ✓ UV stable
- ✓ Root-resistant
- ✓ Bitumen compatible
- ✓ Fire load five times lower than that of a built-up felt roof

- ✓ Self-adhering underside coating
- ✓ Bitumen-free & solvent-free
- ✓ High adhesive strength
- ✓ Bitumen compatible
- ✓ Ideal for steep slope or curved roof areas

## SUPERIOR, LONG-LASTING WATERPROOFING MEMBRANES

**25**

25 Year  
Guarantee

**50**

50 Year  
Service Life

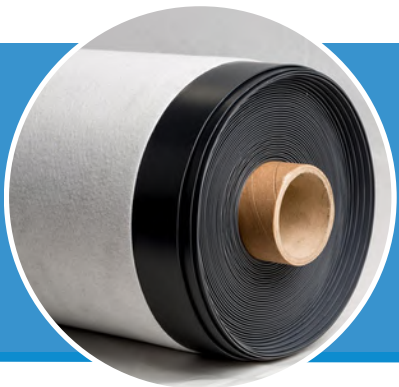

BREEAM  
Accredited

Trusted by  
Professionals

alwitra® has been manufacturing the UK's number 1 waterproofing membrane for 40 years and provides superior quality waterproofing systems to contractors, architects and developers.

What makes EVALON® high-quality membranes is their consistency - a high polymer alloy of EVA and PVC. EVA membranes are free from potentially harmful volatile plasticisers - largely responsible for their longer life expectancy. Their excellent chemical resistance provides a reliable protective membrane against the weather so buildings can stay up for decades.

EVALON® VSK membranes are equipped with a polyester fleece backing and a self-adhesive coating, making installation quicker and easier as it doesn't require additional adhesives. This feature is especially beneficial for projects where minimising installation time or avoiding open flames is crucial.

## PROFESSIONAL UPSKILLING

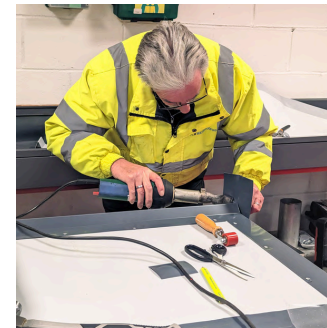

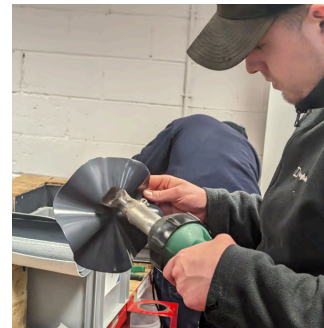

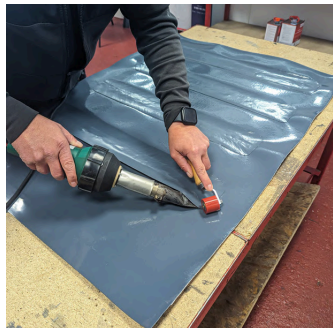

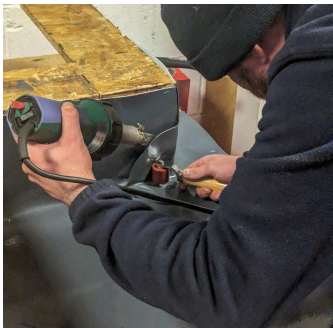

# ARE YOU READY TO ADVANCE YOUR ROOFING SKILLS AND BECOME A SPECIALIST IN THE FIELD?

With extensive industry experience and a range of products to meet every type of roofing application, ICB's training courses will develop both your practical and technical expertise.

The flexible training programmes will build your confidence, knowledge, and expertise within four fast-growing roofing areas and help you to fulfil your potential as a specialist roofing contractor.

Our flagship Waterproofing Training Courses are conducted monthly at our Head Office in Poole and at our Depots in Nottingham, Cardiff and Coatbridge, Scotland, ensuring accessibility for participants across the UK.

## REASONS TO BECOME ALWITRA ACCREDITED

“ We have tried numerous types of single ply, all of which fall short of the standards and quality of alwitra® Evalon VSK. If installed correctly to our exacting standards, then this single ply membrane cannot be rivalled in any way, shape or form. ”

**ICB Approved Contractor**

# ENHANCE YOUR SKILLS WITH ALWITRA® SINGLE-PLY ROOFING COURSES

## alwitra® Single-Ply 3 Day Comprehensive Course

- ✓ BCP approved!
- ✓ Gain ICB Expert Tuition

## alwitra® Single-Ply 1 Day Conversion Course

- ✓ ICB Expert Tuition
- ✓ A practical course for alwitra® specific membranes
- ✓ Achieve Industry-leading Roofing Qualification
- ✓ Become a fully-qualified alwitra® installer
- ✓ Course times: 0900 - 1700. Lunch included

*\*To participate in this training course, we require the participant to show proof of single-ply membrane installation training and to provide evidence of a minimum of 2 years of recent single-ply membrane installation experience.*

## STEP BY STEP GUIDE

### 1 - Initial Assessment

Eligibility check: assessment conducted by ICB's Regional Technical Manager

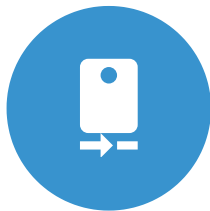

### 2 - Comprehensive Review

Assessment process examining: financial stability, location, reputation, and memberships. Ideally, applicants should be members of the National Federation of Roofing Contractors or listed on a Council's list of approved contractors.

### 3 - Premise Inspection

Quality Assurance: A member of the Sales Team will visit the contractor's premises to evaluate the quality of workmanship and the business infrastructure. This visit is a prerequisite for consideration.

# HOW TO BECOME ALWITRA APPROVED

## 4 - Training & Certification

Once the inspection has been completed, contractors will be eligible for our training courses. Applicants must complete an Application for Contractor Training (Form 3.04).

Candidates with at least two years of experience installing similar membranes may qualify for a one-day intensive course, subject to an evaluation of their installation standards.

## 5 - Quality Monitoring

Quality Checks: ICB periodically reviews the work of Approved Contractors to ensure standards are maintained. Any issues identified by ICB's Sales team or Quality Control Inspectors must be addressed promptly to uphold the integrity of the installation.

All site visits and final inspections are meticulously recorded for continuous improvement and accountability.

## HOW TO APPLY

**Interested parties are encouraged to express their interest by either:**

Contacting ICB Headquarters in Poole directly.

Completing the online form available at:

## WHAT TO EXPECT?

### **Alwitra Single-Ply 3 Day Training**

This BCP approved 3 day training course covers theory, site safety, practical exercises and a final test. To participate in this training course we require the participant to have some roofing experience.

The BCP programme supports the roofing operative with training that gets them on the path of achieving a competency in at least one roofing discipline and obtaining a roofing qualification. By achieving a roofing qualification, the operative can get the Blue Skilled Worker CSCS card.

### **Alwitra Single Ply 1 Day Training**

This 1 day training course focuses on practical training in the specific use of this membrane type.

To participate in this training course, we require the participant to show proof of single ply membrane installation training and to provide evidence of a minimum of 2 years recent single ply membrane installation experience.

### **FLEET Liquid Applied PMMA based 1 Day Training**

This 1 day training course covers practical, health, safety & welfare with Q & A to finish.

Previous knowledge of Liquid Applied Systems is preferable but not essential to participate in this training course.

### **Reinforced Bitumen Membrane 1 Day Training**

This 1 day training course covers practical training. Proof of previous experience of Bituminous Felt products is essential in order to qualify for the 1 day course. A further onsite evaluation may be required.

# PRACTICAL KNOWLEDGE, FULL PARTICIPATION AND ESSENTIAL REQUIREMENTS

All training courses are delivered by ICB's in-house trainers, who are industry experts with many years of practical knowledge.

All ICB (Waterproofing) Ltd courses contain both theory and practical elements. It is, therefore, vital that all attendees are capable of participating fully in all elements of the course.

All attendees should wear appropriate working clothing and PPE (steel toe cap boots & high visibility vest).

Each training course will run from 9 am – 5 pm on specified days. Lunch is provided for all attendees.

A basic tool kit is provided, along with a 3-day alwitra training course.

A tool kit is not provided on the 1-day alwitra training course. Participants will therefore need to bring their own tools (to include a roller, stanley knife, scissors, measuring stick & pencil).

# WHERE ARE WE?

## COATBRIDGE

- 15,000 sq. ft facility in Coatbridge, Scotland
- Opened in 2022 to meet demand

## NOTTINGHAM

- 6652 sq. ft facility in Watnall, Nottingham
- Our newest depot opened in 2025

## CARDIFF

- 2,500 sq. ft facility in Cardiff, Wales
- Opened in October 2023

## POOLE

- 25,000 sq. ft facility at our HQ in Poole, Dorset
- Fabrications manufacturing plant opened here in 2008

Together, the ICB Group of Companies provides an enviable suite of solutions for the construction industry, backed by the assurance of full ISO accreditation for quality, environment and health & safety. We operate from our HQ in Poole, Dorset and our additional facilities situated in Cardiff, Nottingham and Coatbridge, Scotland.

As ICB (Waterproofing) Ltd, we are one of the UK's leading providers of waterproofing solutions, specialising in flat roofing projects. We offer a range of waterproofing solutions, including reinforced bituminous membranes and liquid applied systems, but our strongest expertise lies in single ply membrane solutions where we are the UK's exclusive distributor of alwitra®, a world-leading system of integrated components offering perfect roofing solutions for new build and refurbishment projects.

Our solutions are globally tested and proven, and when you buy from us, you also receive access to our expert consultants. Their knowledge and industry experience is second to none. It can help ensure the solution you install is both a quick and easy application process whilst also having long-term reliability.

Through our sister company, ICB (Fabrications) Ltd., we can offer bespoke metal fabrications and provide these in mill finish or polyester paint coated to any RAL colour desired. A full survey/drawing and design service is also available. ICB (Projects) Ltd. completes the group and provides a design and installation service for ancillary flat roofing products and solutions such as Solar PV, Roof Gardens and Roof Safety Systems, as well as providing installation for ICB (Fabrications) Ltd.

The main idea behind ICB has always been to offer superior quality solutions, whatever the application. That means having great products and offering professional technical backup together with first-class customer support. Into this mix, we try to carry out our business in as environmentally friendly way as possible and indeed in a friendly and socially responsible manner. This attitude has served us well for over 35 years and we aim for it to continue doing so.
